Article 107144

RESEARCH ARTICLES

Research article ☐ Abstract only

Toward performance improvement of supersulfated cement by nano silica: Asynchronous regulation on the hydration kinetics of silicate and aluminate

Heng Chen, Pengkun Hou, Xiangming Zhou, Leon Black, ... Xin Cheng

Article 107117

Article preview Research article ☐ Abstract only

Hydration kinetics and strength retrogression mechanism of silica-cement systems in the temperature range of 110 °C–200 °C

Lijun Sun, Xueyu Pang, Siavash Ghabezloo, Haige Wang, Jinsheng Sun

Article 107120

Article preview Research article ☐ Abstract only

Clarifying and quantifying the driving force for the evolution of static yield stress of cement pastes

Zedi Zhang, Zijian Jia, Jinyan Shi, Yifan Jiang, ... Yamei Zhang

Article 107129

Article preview Research article ☐ *Open access*

Characterisation and hydration kinetics of β -C₂S synthesised with K₂SO₄ as dopant

Sreejith Krishnan, Franco Zunino, Shashank Bishnoi, Karen Scrivener

Article 107119

Article preview Research article ☐ Abstract only

Adding hydrated lime for improving microstructure and mechanical properties of mortar for ultra-high performance concrete

Gui Zhang, Gai-Fei Peng, Xue-Yu Zuo, Xu-Jing Niu, Hong Ding

Article 107130

Article preview Research article ☐ Abstract only

Quantification of the reaction degree of fly ash in blended cement systems

Sen Du, Qingxin Zhao, Xianming Shi
Article 107121

Article preview 

Research article ☐ Abstract only

On the calculation of chloride diffusion coefficient from the multispecies transference numbers in the standard migration test

Rachid Cherif, Carmen Andrade, Abdelkarim Aït-Mokhtar, Ameer El-Amine Hamami
Article 107133

Article preview 

Research article ☐ Abstract only

Nature of aluminates in C-A-S-H: A cryogenic stability insight, an extension of DNA-code rule, and a general structural-chemical formula

Xinping Zhu, Matthieu Vandamme, Laurent Brochard, Zhenlei Zhang, ... Zhengwu Jiang
Article 107131

Article preview 

Research article ☐ Abstract only

Interpretation of the early stiffening process in alkali-activated slag pastes

Yubo Sun, Luiz Miranda de Lima, Laura Rossi, Dengwu Jiao, ... Geert De Schutter
Article 107118

Article preview
