

A numerical model for simulating apparent viscosity of cement paste considering hydration and thixotropy via volume fraction of solids

Original Article | 07 April 2026 | Article: 182

A review of relationship between mix composition and surface texture in asphalt mixture: mechanisms, characterization, and modeling

Original Article | 06 April 2026 | Article: 181

Out-of-plane behavior of masonry walls strengthened with full-length injected tie-rods

Original Article | Open access | 05 April 2026 | Article: 180

Probabilistic analysis on the coupling effect of corrosion reactions and ion diffusion in concrete degradation

Original Article | 04 April 2026 | Article: 179

Life cycle assessment of carbonated recycled concrete aggregates: a critical review and recommendations by RILEM TC 309-MCP

RILEM TC Report | 03 April 2026 | Article: 178

Seismic isolation of rubble masonry using perforated recycled rubber particle cushions

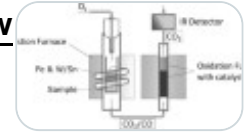

Original Article | 03 April 2026 | Article: 177

The regulating role of C₄AF on the hydration and strength development of cement paste under energy-efficient microwave curing

Original Article | 03 April 2026 | Article: 176

Test methods for CO₂ mineralization in cement-based materials: A review by RILEM TC 309-MCP

RILEM TC Report | Open access | 03 April 2026 | Article: 175
